Specification of Vertical Blow Mould water Tank

Capacity (Liters)	Width (inch)	Height (inch)	Mainhole (inch)
500	34"	40"	16"
750	38"	46"	18"
1000	42"	50"	18"
1500	48"	57"	18"
2000	53"	63"	18"

More Strong

The additional third layer makes it more strong like a Rock. Monocoque structure with bolder ribs support stability and reduce bulging when the tank is full.

Hygienic

Food Grade HDPE material ensures that the water does not get contaminated when in contact with the tank.

Keeps water fresh

Supreme airtight threaded lid ensures that the content of tank is free from dust and flies.

Uniform Wall Thickness

The Latest Evolution of Blow Mould Technology goes a step ahead of its predecessors. It re-examines the frame structure with consistent wall thickness and thereby allows even more effective balanced weight of the whole tank.

Plumber friendly

Multi outlet options along with inlet and overflow configurations help plumbers in easy connections .

Adaptability

Radical exteriors are complimented by the intelligent design which optimizes superior performance and ensures adaptability to various conditions.

Gat No.1391, Akluj-Velapur Road, VELAPUR Tal - Malshiras, Dist - Solapur 413 113.
