

# India's First Water Tank Eco Base

India's first water tank base.

It is essential to have your water tank on a flat level compacted base. A level base is very important as it will keep the pressure even across the entire base of the water tank.

The base of your water tank must be fully supported at all time

- Very durable & Light.
- Cost effective compared to traditional
- Cemented base.
- Quick installation.
- Available in Different sizes.
- Easy to move.
